

## Get ECDIS onboard from \$629 per month including equipment, support and ENC's.

Approved by DNV, the Navmaster 800 offers the latest in ECDIS technology and is ideal for both retrofit and new build. Utilising a robust solid-state hard drive, it works within the familiar MS Windows environment and its design ensures that additional features do not distract the user from core tasks. The Navmaster 800 is compatible with all ENC's, has excellent route planning, ARPA/AIS information and overlays.

- **Flexible pricing options available from direct purchase to monthly rent/purchase starting from \$629 pcm.**
- **Installation available at all major ports around the world**
- **Class 'A' International Admiralty Agent and suppliers of paper and electronic charting.**
- **Support package with 24/7 helpline and remote diagnostics is available directly to the mariner.**
- **Full type approved training courses available globally with more in the pipeline. Bespoke training packages also available.**
